I. All semi-finalists are required to participate in the Project Exhibition, usually held in April after the submission deadline of the final report.

II. The exhibition is open to public and is usually held for 2 to 3 weeks.

III. Each project will be assigned a booth, where the semi-finalists can present their projects in the form of a poster exhibition, along with on-site demonstration of their new invention or display of any project deliverables such as models, photographs, leaflets, booklets, etc.

IV. Each booth is provided with the following:
   
   i) Two display boards, each with the dimension 130 cm (H) x 98 cm (W);
   
   ii) One standard-size folded table and two chairs to be placed in front of the display boards.

V. Sockets for laptop computers are available at the booths. Semi-finalists should bring their own laptops or electronic devices if needed for their presentation.

VI. The Selection Committee will visit the booths during a scheduled time period for direct communication with the semi-finalists. Semi-finalists (or at least two members from a group) should arrive at the booth earlier than the scheduled time for any necessary setup or preparation.
